

MOZAMBIQUE

IN 2022

2022 marked the end of the state of emergency linked to the COVID-19 pandemic in Mozambique, but also the **persistence of insecurity in the Cabo Delgado Province**, the northernmost part of the country, where the number of internally displaced people soared to an alarming 1 million out of the 2.3 million who live in the province. In recent years Doctors with Africa CUAMM has helped to develop a **humanitarian response** that incorporates our already-ongoing development programs (with a special focus on **maternal and child health**) while simultaneously **addressing other key needs of the internally displaced population** as well. Basic medical assistance services continued to be provided to those settled in camps that did not provide such services, as well as to the communities hosting the camp dwellers.

We also conducted **community awareness-raising and educational activities** on the most **widespread endemic diseases**, including COVID-19, cholera, malaria, in 6 districts of Cabo Delgado, and solidified a vital project in support of **mental health** and **victims of gender violence**.

CUAMM continued to bolster its long-time efforts to combat **non-communicable chronic diseases** (diabetes, cervical cancer, hypertension, and more) in the Sofala, Zambézia and Maputo provinces, adding a specific component to support the services of **4 hospitals for children and adolescents affected by Type 1 diabetes mellitus** and launching a pilot project for a **decentralized outpatient clinic** to treat these diseases.

In addition, we continued our work in Sofala Province, providing support to the **neonatal and pediatric unit at Beira Central Hospital** as well as to ongoing programs aimed at **tackling HIV/AIDS**, especially in adolescents.

On the **maternal and child health** front, CUAMM proceeded with its **adolescent sexual and reproductive health** project in Tete Province, and devised a small **early childhood development** initiative in Zambezia.

By the end of the year, CUAMM brought to a close our work alongside local authorities on **COVID-19 vaccination campaigns** in Tete and Sofala Provinces.

WHERE WE WORK

TETE PROVINCE

3 districts
10 health centers
123,000 population served

CABO DELGADO PROVINCE

2 hospitals (Montepuez and Pemba)
18 health centers
9 districts
1,437,856 population served

SOFALA PROVINCE

4 hospitals (Beira Central Hospital, Nhamatanda Hospital, Buzi and the Dondo health center, which has hospital status)
1 university (Catholic University of Mozambique)
10 health centers
4 districts
1,250,665 population served

MAPUTO PROVINCE

4 health centers

Technical support on diabetes, hypertension and cervical cancer

ZAMBEZIA PROVINCE

2 hospitals (Rural de Mocuba and Quelimane)
4 health centers
2 districts
880,546 population served

RESULTS ACHIEVED

 MATERNAL AND CHILD HEALTH	153,240 prenatal visits conducted	110,307 deliveries attended	69,695 under-5 children examined	4,070 trips provided for obstetric emergencies
 INFECTIOUS DISEASES	196,922 adolescents informed/educated about HIV/AIDS	143,162 adolescents tested for HIV	1,070 HIV-positive adolescents	
 CONTINUAL TRAINING	46 University of Beira graduates			
 CHRONIC DISEASES	3,714 visits for diabetes	25,114 visits for hypertension	389 patients with diabetes
